Neighborhood Learning Alliance

Warrior Program

Remake Learning: Digital Badges

Remake Learning Days: May 10-20

On any given day in Pittsburgh, a child can access a deliberate pathway of learning based on his or her own interests. A child interested in coding can get help from Teens as Teachers at Assemble, a neighborhood afterschool space, or drop in on a workshop at her local library where she experiments with robotics. That in turn may lead her to Tech Warriors, an after school program at the Neighborhood Learning Alliance. There, kids are building robots with the help of local high school mentors, using kits developed by Carnegie Mellon University's National Robotics Engineering Center.

Week 6: Final Project
